SHAN CHRISTIAN M. PLATON

Aspiring Software / Web Developer

0956 893 2434 | platonshan0@gmail.com | Tanauan City, Batangas, Philippines
shan-platon-portfolio.vercel.app | github.com/ShanPla | linkedin.com/in/shan-platon-933454448

OBJECTIVE

Computer Science student seeking an On-the-Job Training (OJT) placement to apply and grow frontend development skills in React, TypeScript, and React Native, while gaining hands-on exposure to backend development, database architecture, and full-stack integration.

EDUCATION

Bachelor of Science in Computer Science

De La Salle Lipa | 4th Year | Expected Graduation: 2027

TECHNICAL SKILLS

- **Frontend:** React 18, Next.js 14 (App Router), React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite
- **Backend & Database:** Supabase (PostgreSQL, SQL, Auth, Storage, Realtime, RLS Policies, RPC)
- **Mobile & Deployment:** Expo (SDK 54), Vercel, EAS Build
- **Hardware & IoT:** ESP32, Arduino (C++), Blynk, sensors and breadboard prototyping
- **Data & ML:** Python, NumPy, R, Quadratic Regression, Classifier Evaluation
- **Tools & Networking:** Git/GitHub, Lucide React, Cisco Packet Tracer (VLAN, DHCP, Routing)

PROJECTS

LipaAction - Barangay and City Web Console (Undergraduate Thesis, Defended) 2025 - Oct 2026

Next.js 14, React 18, TypeScript, Tailwind CSS, Supabase, Vercel, React Native, Expo | Web Console Developer

- Built and deployed the web console of a multi-agency incident reporting system for Lipa City: a live triage queue where barangay officials validate, reject, and route residents' reports to city agencies, plus a read-only city dashboard with an incident map.
- Integrated Supabase Auth (email one-time codes, authenticator-app two-step sign-in), Row Level Security, database functions, and Realtime updates, with role-based page gates and input-validating Server Actions.
- Implemented privacy-by-design features guided by the Data Privacy Act: an access trail of report openings, recorded exports, and reporter identities that are never displayed.
- Delivered an English/Tagalog interface, WCAG 2.2 AA accessibility (keyboard navigation, 44 px targets, contrast), a nonce-based Content Security Policy, and a 200+ case test workbook.
- Contributed to the team's Expo resident app: an English/Tagalog toggle on every screen, a card-based restyle of sign-in, reporting, inbox, and chat, and an offline start that reaches the report screens with no signal.

The Chronicle - Mini Social Media Web Application May 2026 - Nov 2026

React 18, TypeScript, Supabase, Vercel | Full-Stack Personal Project

- Architected and deployed a full-stack social media application using React 18, TypeScript, and Supabase, supporting real-time messaging, post interactions, and custom user profiles.
- Built secure backend data pipelines leveraging Supabase PostgreSQL, custom Row Level Security (RLS) policies, and real-time subscription channels.
- Implemented client-side features including multi-image collage rendering, optimistic UI updates for likes/comments, a debounced global search bar, and accessible custom CSS animations.
- Structured dynamic client-side role management using admin privilege policies to enforce server-side post moderation.

ESP32 Fire Detection System - IoT Course Project Sep 2026 - Nov 2026

ESP32, Arduino (C++), Blynk | Firmware, Hardware & Dashboard (Team of 3)

- Wrote the four-stage hazard logic for gas, temperature, humidity, and sound sensors: brief spikes filtered out, an instant alarm at Critical, and hysteresis so the LEDs and buzzer do not flicker near a threshold.
- Added sensor-fault detection (a silent DHT11 or a stuck MQ-2) and Wi-Fi/Blynk outage monitoring that reports faults from the offline period once the device reconnects.
- Built the Blynk dashboard with gauges, status text, phone notifications, and a test mode that simulates gas readings; wired the breadboard and wrote the setup guide.

TRAININGS & SEMINARS

- DataCamp: Introduction to Python, Introduction to R, AI Ethics
- Cybersecurity Awareness and Digital Security (Seminar)
- Project DeepDive Session 2: Hardware (Seminar)
- Hello World to the Real World: A Tech Industry Survival Guide (Seminar)
- CaLaBaRZon Young Innovators' Challenge (Seminar)
